MEMORANDUM FOR: Executive Director

1. I discussed with the Director my proposal to move OSI lock, stock, and barrel into DD/R. He approved. I have not talked to Cline or Scoville about this and if I do not get a chance to do so before Thursday, wish you would do it. Under no circumstances is there to be any diminution of liaison, source materials, analyses, etc. I expect a major hassle again so please keep me clued in.

2. Mr. McCone is most anxious to get the CIA Research Board operating again and to have it adequately staffed and used by the entire Agency. Please take a reading on the present status of this.

A handwritten signature, appearing to be "MSC", is written over a horizontal line.
